

Skitch

Learning
by
Doing

For the following activity, please make you download the skitch app.
We will use this app to create visuals and reinforce the concepts of:

Unit Price
Ratios
Angles
Inequalities

And many others as the semester goes on...

- 1) Take a photo using your ipad.
- 2) In the skitch app, draw on it showing how you found the unit price, ratios, acute, obtuse, right, and supplementary or complemenatry angles.
- 3) Try to find a google image that captures the idea of an inequality
- 4) Email me your finished product

Some examples are below:

15x
Quantity

Unit Price = price / quantity
= 24.50 aed / 15
= 1.633333
= 1.63 dh per each bounty

Price

BOUNTY MINIS427.5612
24.50 AED 1156 62 1821458
09/17/14
1033 **24** .50 AED

Always round to two decimal places for money
